

Honeywell Placement Paper

Honeywell - Sample Placement Question Papers

wrote Honeywell test on June 11, 2006 at Loyola College Chennai and got selected for technical interviews. Interview was at Madurai. Since I am from Computer Science & Engineering branch, I am giving only CSE paper, they had two different papers, one for CS and other for Electronics streams.

There was two Parts of test, first containing 100 multiple choice questions and second containing descriptive questions from various subjects of CSE. Multiple choice questions had 25% NEGATIVE marks on wrong answers. Descriptive questions are very important, because it is going to play very important role for your selection and in Interviews too they will have your descriptive answer sheet and will ask questions from that. So write well descriptive questions, it is not very tough.

Part I (Time 90 minutes) with $\frac{1}{4}$ Negative marks.

Multiple choice questions were divided into three parts

1. 50 Technical questions from the following subjects
{C, C++, Data structure, Operating System, Computer Networks, Database, Software Engineering, Real time systems, Compiler Design, Algorithms, Microprocessor and Computer architecture.} **From every these subjects they has asked 3-7 questions.**
2. 30 questions from C(It was same for all branches). 30 C programs were given and we were asked to find the output of those programs or what is error in that. Almost all programs were from structure, union, pointers, Arrays, Enumerated data types and macros.
3. 20 Aptitude questions(Very Very easy, even class 8 th student can solve all 20 questions.)

Part II (Time 30 minute) NO -ve marks.
